

**Dr. Joshua A. Mott**

*Senior Advisor on Influenza and Pandemic Preparedness, World Health Organization, Department of Epidemic and Pandemic Prevention and Preparedness*

Dr. Joshua A. Mott is the Senior Advisor on influenza and pandemic preparedness to the World Health Organization's Department of Epidemic and Pandemic Prevention and Preparedness. Previously, he was the CDC Southeast Asian Regional Influenza Program Director. In this capacity he provided technical oversight and supervision to surveillance, preparedness, and policy-relevant work not only in Thailand, but also through regional supervision Lao PDR, Indonesia, Myanmar, and Bangladesh. Dr. Mott also served as the Chief of the CDC Epidemic Intelligence Service (EIS), and the CDC Influenza Program Director in Kenya. From 2009-2011, he was also the CDC influenza technical advisor to the WHO Regional Office for Europe.

Prior to working in influenza and EIS, Dr. Mott worked in the areas of biothreat agents, complex emergency field response, and environmental health. He also served as the epidemiology lead for CDC-Thailand's response to the COVID-19 pandemic. He also has worked as an EMT-Paramedic. Dr Mott holds a PhD in community health and epidemiology from the University of Illinois at Champaign-Urbana, with a post-doctoral fellowship from the University of Illinois-Chicago.
